# CLASSES / CATEGORIES

This is the class and scoring system of the competition itself.

AAT recognizes two stages of vessel preparation within the official categories of the UIM, in order to have as realistic and equal as possible. So it scores and rewards classes separately within categories, but only in its internal scoring.

# SCORING OF STAGES AND SUM OF RESULTS

The competition is a combination of JETRAID and ENDURANCE races.  
Therefore, there are several scoring levels:

## 1. JETRAID runs on time accumulation.

All drivers start at the same time and everyone starts measuring the driving time at the same time, which is stopped for each driver upon his arrival at the final location of the day.

At all "refueling check points" a "time period of neutralization" will be determined for all competitors and they will depart from the check point in the same time intervals as they arrived at it - but after a mandatory stop and the expiration of the "time period of neutralization".

Jetraid scoring:

- Daily passing times are ranked from smallest to largest and are assigned adequate points (JETRAID DAILY POINTS - JDP) which are triple the endurance points of each moto.
- All JETRAID DAILY POINTS are added up at the end of the competition and ranked from highest to lowest.

## 2. ENDURANCE is raced at each final daily location in two motos.

Each moto lasts 30 minutes.

It is driven on an aquatoria of 5-10 buoys with a length of approx. 2-5 km depending on the location.

Endurance scoring:

- After driving both daily motos, the points won for each moto are added up and ENDURANCE DAILY POINTS - EDP are obtained and they are ranked from the largest to the smallest
- All ENDURANCE DAILY POINTS are added up at the end of the competition and ranked from highest to lowest.

**3. GRAND TOTAL** is the sum of all JETRAID DAILY POINTS AND ENDURANCE DAILY POINTS and they are ranked from the largest to the smallest and thus the ranking lists of each class are obtained.
